The Divisional Meteorologist for the State reports "The outstanding feature of the agricultural season (1924-5) has been the splendid and opportune rains which occurred during the latter and most critical period of the growing crops. Despite the marked decrease in the 1924 rainfall, the season demonstrates the fact that the incidence of rainfall is more important than the aggregate amount.

PRODUCTION.

Wheat.—30,528,625 (34,551,955) bushels, averaging 12·21 (14·29) bushels per acre.

Benefits of Fallowing.—For the purpose of definitely noting the advantages or otherwise of cropping on fallowed land, farmers were requested to separate the results when furnishing their returns, from which it is ascertained that 24,645,303 bush., averaging 14·75 bush. per acre were reaped from crops sown in fallowed land, and 5,883,322 bush., averaging only 7·09 bush. per acre from crops sown on unfallowed land.

The following is a summary of the wheat averages per acre for the full crop and the proportions from fallowed and unfallowed land, together with the areas sown in the several divisions of the State:—

WHEAT AREAS AND AVERAGES PER ACRE.

Division.	Total Wheat Average.	On Fallow Land.		Not on Fallow Land.	
		Area.	Average.	Area.	Average.

The State ..	12·21	1,670,597	14·75	829,255	7·09

One-third of the crops sown were on unfallowed land and averaged less than half the yield per acre than the crops on fallowed land, and thus considerably reduced the general average for the State.

Barley.—3,103,718 (3,251,885) bushels, averaging 18·65 (17·65) bushels per acre. Of this total barley, 2,853,255 bush. were returned as malting, and 250,463 bush. as Cape and other.

Oats.—1,939,415 (2,157,938) bushels, averaging 12·50 (12·24) bushels per acre.

Hay.—All kinds, 716,749 (781,768) tons, averaging 1·27 (1·24) tons per acre. The various kinds were—Wheaten, 410,138 (500,572) tons; oaten, 288,890 (261,581) tons; lucerne, 14,157 (11,908) tons; and other, 3,564 (7,707) tons.

Peas.—115,505 (64,847) bushels, averaging 12·16 (13·48) bushels per acre. This is the greatest harvest of peas since 1912-13.

Straw.—All kinds, 7,352 (9,453) tons.

EXPORTS OF BREADSTUFFS.

The oversea exports of breadstuffs for the year ended June 30th, 1925, in comparison with the previous year were:—

All other Value	—	—	2,418	2,044
Total	—	—	£ 9,034,638	£ 7,171,770

The foregoing figures include the produce of two seasons. The export of wheat, flour, and barley for the seasonal year 1924-25, that is, from December, 1924, to June 30th, 1925, the latest record of date, would represent the produce of the 1924-25 crops. For this period, 1,255,902 bush. of barley and 19,393,317 bush. of wheat and 36,296 tons of flour were shipped—the total of the latter two items in the form of wheat being 21,135,525 bush. Allowing for home consumption, this would leave a further exportable surplus of approximately 3,000,000 bush. Since June 30th, it is estimated that over 1,000,000 bush. has been exported, making the exportable balance at date of this report about 2,000,000 bush.
